# ABOUT THIS GUIDE

This guide offers support for customized deployment of MindManager Reader to large numbers of client machines.

**Topics include:**

- ✦ Running the standard setup manually on Windows and macOS
- ✦ Running the admin setup on Windows
- ✦ Uninstalling MindManager Reader on Windows and macOS
- ✦ Deploying with a MindManager license key
- ✦ Specifying the MindManager Reader user interface language
- ✦ Disabling Google Analytics tracking

## MindManager Support Help

For technical support with this product, go to <http://www.mindjet.com/support>. Here you will find links to the Knowledge Base articles, User Forums, and other online resources. You can also submit a support request for additional assistance.

## Running the Standard Setup Manually

MindManager Reader can be deployed on a machine-by-machine basis using the standard setup on Windows and macOS. The standard setup is robust, interactive, and user-friendly, but does not support customized deployment.

Using the standard setup has these advantages:

- ✦ MindManager Reader installs and operates properly on supported systems
- ✦ It requires no additional software or server resources
- ✦ Users with local administration privileges can manage the update process individually

And these disadvantages:

- ✦ Manual installation is time-consuming
- ✦ The installed software uses up disk space on each user's system
- ✦ Centralized administration becomes more difficult
- ✦ Access to the original installer is required for repair and other setup operations

### Windows

1. Double-click the downloaded installation file (MSI).
2. Carry out the installation by following the on-screen instructions.

### macOS

1. Double-click the downloaded installation file (DMG).
2. Drag the MindManager Reader App icon to the Applications folder.
3. Eject the DMG file.

## Running the Admin Setup Manually or Automatically

The MindManager Reader Admin setup provides more control over installation and administration on Windows (7, 8.1, 10).

Using the admin setup has these advantages:

- ✦ MindManager Reader installs and operates properly on supported systems
- ✦ It requires no additional software or server resources
- ✦ You can customize installations on a per-group or per-user basis
- ✦ You can run the installation silently
- ✦ The installer is not cached on the client machine, reducing the required disk space

1. Open the Command Prompt.
2. Run the following script at the disk where the installation file is:  
`msiexec.exe /i "InstallationFileName.msi" /qr`

## Specifying the language of the UI

By default, the language of the MindManager Reader user interface is set to the language of the operating system. Administrators can choose a UI language that is different from the one used by the OS.

1. Open the Command Prompt.

2. Run the following script at the disk where the installation file is:  
**msiexec /i "MindManager Reader\_win32\_3.0.113.msi" ProductLanguage=XXXX**

Where **XXXX** is one of the following product language codes:

- Arabic — 1025
- Basque — 1069
- Bulgarian — 1026
- Catalan — 1027
- Croatian — 1050
- Czech — 1029
- Danish — 1030
- Dutch — 1043
- English — 1033
- Finnish — 1035
- French (France) — 1036
- French (Canada) — 3084
- German — 1031
- Hungarian — 1038
- Indonesian — 1057
- Italian — 1040
- Japanese — 1041
- Norwegian — 1044
- Polish — 1045
- Portuguese (Brazil) — 1046
- Portuguese (Portugal) — 2070
- Russian — 1049
- Slovak — 1051
- Slovenian — 1060
- Spanish — 1034
- Swedish — 1053
- Thai — 1054
- Turkish — 1055

## Uninstalling MindManager Reader

Users can uninstall MindManager Reader from their workstations.

### Windows

1. On the Windows Control Panel, click **Uninstall a program**.
2. Double-click **MindManager Reader** on the **Uninstall or change a program** page.
3. Click **Yes**.

### macOS

1. Click the **Finder** icon in the Dock, then click **Applications** in the Finder sidebar.
2. Drag **MindManager Reader** from the Applications folder to the Trash (at the end of the Dock).

## Deploying MindManager Reader with a license key

Administrators can deploy MindManager Reader with a license key.

1. Open the Command Prompt.
2. Run the following script at the disk where the installation file is:  
**msiexec.exe /i "InstallationFileName.msi" LICENSEKEY=RP19-MM1-DP78-71ME-C17F /qr**

## Disabling Google Analytics tracking

MindManager Reader uses Google Analytics to gather information about product usage. This data is anonymous and is only used to improve product performance and user experience. Administrators can disable Google Analytics tracking.

1. Open the Command Prompt.
2. Run any the following command:  
**msiexec.exe /I "InstallationFileName.msi.msi" FEEDBACK="0" /qn**
